

Peplink for Public Safety

5 things you didn't know Peplink can do for Public Safety

Peplink's **Mission**

Unbreakable **Connectivity**

A N Y T I M E

A N Y W H E R E

Top 5 useful features

1

IC2 GPS & WAN Quality Reports

2

GPS Broadcast & Export

3

Zero Touch Configuration

4

IC2 SpeedFusion Configurator

5

IC2 Alerts

Public Safety Portfolio

Public Safety Portfolio

Unbreakable Connectivity Options For All Budgets

1x Cellular Models

Transit Mini with 1x CAT4

BR1 ENT with 1x CAT12

Transit with 1x CAT12

2x Cellular Models

Transit Duo with 2x CAT12

HD2 with 1x CAT12 + 1x LTE

HD2 IP67 with 1x CAT12 + 1x LTE

HD2 Dome with 1x CAT12 + 1x LTE

3x Cellular Models

FlexModule with 3x CAT12
(for EPX, SDX)

4x Cellular Models

HD4 with 1x CAT12 + 3x LTE

HD4 MBX with 4x CAT12

ESN Portfolio

Unbreakable Connectivity Options For All Budgets

1x Cellular Models

BR1 ESN
with 1x CAT12

2x Cellular Models

HD2 MBX
with 2x CAT18

4x Cellular Models

HD4 MBX
with 4x CAT18

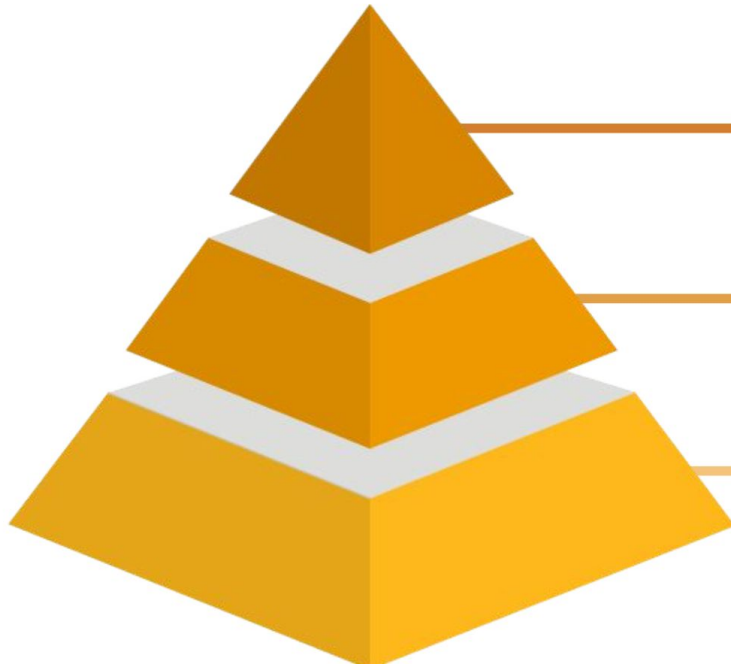

Achieve **Unbreakable Connectivity**

Combine Public Safety LTE and commercial links into an unbreakable VPN connection

- Patented SpeedFusion technology
- Combine Public Safety LTE and commercial links into an **unbreakable VPN** connection
- greater coverage and bandwidth than that of a single cellular link

SpeedFusion Modes

Bandwidth Bonding: Combine the speed and Bandwidth of multiple WAN connections.

WAN Smoothing: Single and Multi-WAN Smoothing modes to protect real-time applications.

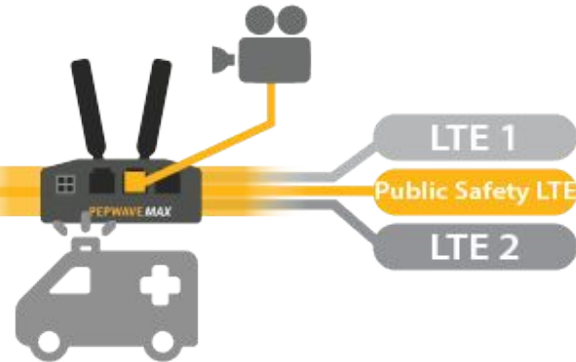

Hot Failover: Switch from one WAN connection to another while keeping your sessions intact.

Live Streaming Videos/DVRs

Bond multiple cellular links into a powerful VPN connection

Datacenter FusionHub

Public Safety Vehicle with ESN Devices

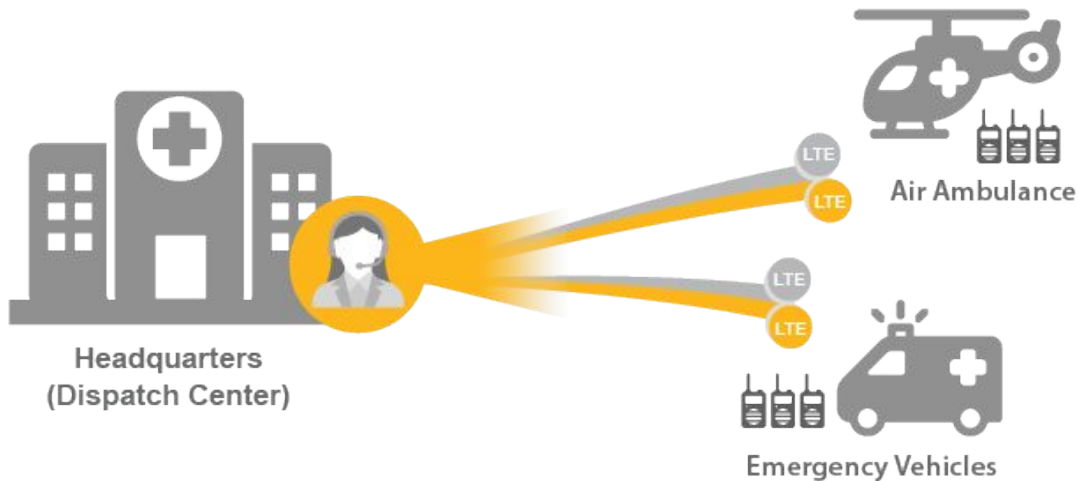

- SpeedFusion can **bond multiple cellular links**
- can stream HD video back to headquarters
- **WAN Smoothing technology**
- ensures that your video stream remains consistent and uninterrupted

Extend 2-Way Radios Anywhere

Extends the reach of existing 2-way radio networks to anywhere

- SpeedFusion creates a single unbreakable network
- **extends the reach of existing 2-way radio networks** to anywhere an LTE or other IP network is available
